Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>1-14</u>	YES
	Claims _____	NO
Inventive step (IS)	Claims _____	YES
	Claims <u>1-14</u>	NO
Industrial applicability (IA)	Claims <u>1-14</u>	YES
	Claims _____	NO

Claims 1-14

Document: 1 JP 7-222112 A (Sharp Corporation)

18 August 1995, full text, Figs. 1-9

Document: 2 JP 2000-57691 A (Sony Corporation)

25 February 2000, full text, Figs. 1-9

Document: 3 JP 11-250587 A (LG Denshi K.K.)

17 September 1999, full text, Figs. 1-7

Document 1 (see claim 1 etc.) describes that reproduced data read from a medium are stored in a memory, the reproduced data are output from the memory after a prescribed time, and the prescribed time is a time required for randomly accessing a non-continuous portion.

Document 2 (see claim 2 etc.) describes that an increased amount of a stored data amount is calculated based on a readout rate.

Regarding the inventions of claims 3 and 10, document 1 (see claim 4 etc.) also is so configured so as to comprise a decoder.

Regarding claims 5 and 14

Reproducing data by skipping reading data other than those in a content data region is generally carried out. Also, skipping reading a defect region to perform reproduction is a commonly used technology (see, for example, document 3, claim 12 etc.).

Therefore, the inventions of claims 1-14 do not appear to involve an inventive step.

WRITTEN OPINION OF THE

PCT/JP2004/011222

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Regarding claims 4 and 11

The invention of claim 4 relates to the following: the minimum length of a continuous region is determined based on ...data rate and...reproduced data rate,...stored data size,; and the stored data size is determined based on the longest seek time,...data size,...and prescribed size. The invention of claim 1 relates to reproducing content. Therefore, the invention of claim 4 is found to relate to a method for performing recording so that the minimum length of a continuous region is regulated to cause continuous reproduction, that is, "recording content".

Therefore, the relationship between claim 1 and claim 4 is not clear.
Similarly, the relationship between claim 1 and claim 11 is not clear.
